Invictus durability: The role of sport in identity reconstruction of injured military personnel
10. Troy Deskins, *Ohio University*
Overriding desires to avoid health feedback relates to increased defensive responding
11. Katherine Duggan, *University of Pittsburgh*
Prospective associations of adolescent conscientiousness with metabolic syndrome and psychological resources in Black and White men
12. Laura Finch, *UCLA*
An experimental test of the psychophysiological effects of health and unhealthy comfort eating

Poster Presentations

13. Arielle Gillman, *University of Colorado, Boulder*
Exercise identity and behavior maintenance after a supervised exercise intervention
14. Darwin Guevarra, *University of Michigan*
Are they real? Addressing response bias issues in non-deceptive placebo research
15. Erik Knight, *University of Oregon*
Exogenous testosterone enhances cortisol and affective responses to social-evaluative stress in high-dominant individuals
16. Nikolette Lipsey, *University of Florida*
Audience effects and health information avoidance
17. Michaela Moss, *University of California, Berkeley*
The association between cumulative life adversity and telomere length across the adult life span
18. Joshua Paul, *Claremont Graduate University*
Latent structures of athletic participation motivations among undergraduates
19. Catherine Rochefort, *Southern Methodist University*
Experiential avoidance moderates the relation between exercise enjoyment and exercise behavior
20. Lindsey Rodriguez, *University of South Florida, St. Petersburg*
Expressive writing as a brief intervention to reduce student drinking
21. Margarita Sala, *Southern Methodist University*
Affective response after exercising
22. Heather Scherschel, *University of Minnesota*
Can comfort food soothe the rejected soul? Effects of comfort food for social and physical distress
23. Richard Smith, *CUNY Graduate Center*
Racial cues and racial identity shape affective and physiological responses to racial discrimination
24. Erin Standen, *UCLA*
Using weight salience to encourage healthy eating: An experimental field study

Social Personality & Health Network Steering Committee

President	Traci Mann
Secretary	Mary Gerend
Treasurer	John Updegraff
Fundraising Coordinator	Krista Ranby
Student & Postdoc Representative	Jeff Hunger
Listserv Moderator	Jason Rose
Representatives	Jamie Arndt Angela Bryan Sally Dickerson Andrew Geers Bill Klein Alex Rothman

*The National Science Foundation's guidelines were used to determine when there was a conflict of interest between an applicant/nominee and an awards committee member. Committee members were not involved in the discussion or evaluation of any candidate with whom they had a conflict of interest. After a short list was determined for an award, committee members who had a conflict of interest with any of the final candidates recused themselves from the entire discussion; when necessary, additional committee members were recruited to replace those who were recused.

Thank you for a fabulous
preconference. See you in Atlanta!

SPHN Preconference
2018
